

Viking Plastics Engineering P/L

Bespoke Plastic Tank Fabrication

featuring

Paneltim®

Plastic Sandwich Construction Panels

Applications include:

- Spawning & Hatching Tanks
- Larvae Raring Tanks
- Parabolic Tanks
- Maturation Tanks
- Raceway Tanks
- Broodstock Holding Tanks
- Algae Production Tanks
- Artemia Feed Tanks
- Water Treatment Tanks
- Ice Bins
- Pond walls to prevent erosion

**Polyethylene black pond
channel liner also available**

For over 50 years, Viking Plastics has supplied world class customised plastic fabricated products for all types of specialised applications including trade waste tanks and, more recently, custom tanks for Australia's aquaculture industry.

Paneltim® is an innovative 50mm thick, dual skin sandwich panel with an internal cross-rib cell structure that is light weight yet offers superior strength and rigidity in both length and width.

Paneltim® panels are made from Polypropylene copolymer (PPCO) or High Density Polyethylene (HDPE) and assure excellent mechanical and chemical features. They are easy to weld into any dimension using butt welder, hot air or extrusion welders.

- ✓ Excellent thermal & biosecurity properties
- ✓ Hygienic ✓ Easy to clean ✓ Chemical resistant
- ✓ Static & dynamic stability ✓ Shockproof & UV stabilised
